SPECIAL INSTRUCTIONS

1. CLEARANCES

All trains must receive clearances before leaving Union and New Albany.

2. SUPERIORITY OF TRAINS

Northward trains are superior to trains of the same class in the opposite direction.

3. JOINT OR SPECIAL USE OF TRACKS

B&HS trains using tracks of GM&O at Beaumont will be governed by GM&O rules and regulations.

ME trains using tracks of GM&O at Evanston will be governed by GM&O rules and regulations.

FC&G trains using tracks of GM&O between Foxworth and Columbia will be governed by GM&O rules and regulations.

GM&O trains using tracks of IC and Southern at Meridian will be governed by IC and Southern rules and regulations.

GM&O trains using tracks of Southern between Slidell and New Orleans will be governed by Southern rules and regulations.

Normal position of main track switch at south end of Iselin Yard will be lined for yard lead.

Crossover switch at Middleton will be known and used as north siding switch.

Crossover switch at Philadelphia will be known and used as north siding switch.

4. REGISTER STATIONS

GP denotes gravel pit

13. TRAIN BRAKES

When a locomotive is to be cut off a freight train or train is to be separated, engineman will make a twenty-pound brake pipe reduction. When the brake pipe exhaust has ceased to blow indicating completion of such a reduction, the engineman will give one short blast of the whistle to inform the trainmen they may close the angle cocks and cut off the locomotive or cars.

Sufficient hand brakes should be applied to this cut of cars as a further precaution in the event the air supply becomes depleted.

14. ACCIDENTS

Employees who witness or have any knowledge whatever of an accident involving the public, must not give information of the same to attorneys, the injured persons, or anyone else except this company's officers and claim agents, unless legally required. Persons seeking information as to any accident should be referred to the claim agent.

An employe served with subpoena to report to any court or officer must at once notify superior official and act under his direction.

15. WARNING

All employees are warned that it is dangerous to ride on tops or sides of cars, or to lean out from engines, or cars while passing such as platforms, engine houses, freight houses, storage houses, warehouses and nearby fences, telephone poles, crossing gates, cotton platforms, cottonseed houses, log derricks, piles of lumber and similar structures.

SAFETY - FIRST

PRECAUTIONS

Bear in mind that Eternal Vigilance is the price of SAFETY and that SAFETY must have first consideration in the operation of this property.

Rules are the result of past experiences. A wise man does not pit his judgment against them. Observe all rules and be safe.

The time to prevent an accident is before it occurs.

Conductors and engineers! be sure you understand your orders. Read them twice and check Nos. against clearance.

Don't fail to ring bell or blow whistle at dangerous places.

Don't stand on end of a car without having a secure hold.

Don't sit on brake wheels of cars.

Don't stand close to pole when poling cars.

Don't go between cars to make a coupling.

Don't attempt to adjust couplers on moving cars.

Don't kick drawbars or open knuckles with the feet.

Don't walk on frogs, switches, guard rails or interlocking machinery or connections.

Don't cut air in too abruptly; use sufficient time and avoid sticking brakes.

Avoid coupling to or going against standing engine-motor on or around inspection pit tracks, until assured no one is working on or about them.

When using jacks under rails, place outside if possible.

Loose ties and rails should be kept away from the track to give trainmen sufficient clearance.

Remove motor cars from track when they are not in use.

Stand back at a safe distance when cars pass to avoid being struck by protruding objects.

Agents and operators should note condition of trains as they pass their stations.

Handle telephone receivers, during lightning storm, in such a manner as not to cause contact with any metallic substance.

Employees must not ride on the forward footboard of yard engines on long moves or transfers in yard.
